ONE ENGINE. SIX EDITIONS. CHOOSE YOURS.

Your plant keeps the records. CAPMAC reads them.

Leaks, sticking valves, drifting chillers and wearing machines leave their mark in routine records. CAPMAC reads those records and names what it finds, in plain words.

SIX EDITIONS, ONE FAMILY

CARI-Pani

WATER NETWORKS

Which zone is losing water, which pump wastes power, which meter is wrong, which pipe to replace first.

CARI-Loops

CONTROL LOOPS AND VALVES

One ranked list of the loops and valves that need attention, with the next check on every line.

CARI-Tune

LOOP SETTINGS

Three new settings, slow, normal and fast, for each loop that needs retuning.

CARI-Chiller

COOLING PLANT

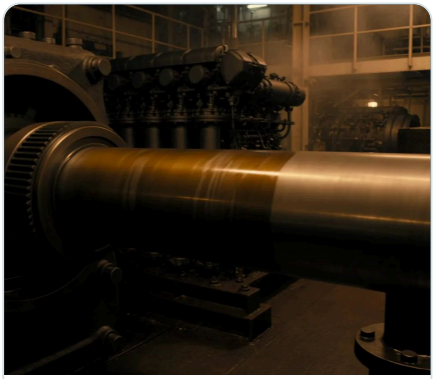

Chiller alerts with an urgency grade, and named findings with dates for every other plant unit.

CARI-Gold

GOLD FLOOR

The gram account of every cast job, and one floor page for fifteen kinds of machine.

CARI-Navi

PROPULSION TRAINS

A plain verdict for each machine of the propulsion train, one findings list and one printed report.

No new sensors. Runs on your own PC. Load the routine records you already keep, and read findings your team can act on.

WHAT CAPMAC DOES

Your records in. Named findings out.

Choose the edition for your plant and load the records you already keep. Each edition lists what goes in and what comes out.

YOU LOAD

The routine records you already keep: trend exports, run logs, weighings, survey sheets.

→

CAPMAC

One engine

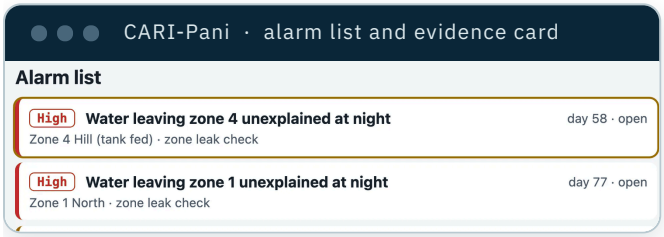

Six editions, each built for its own plant.

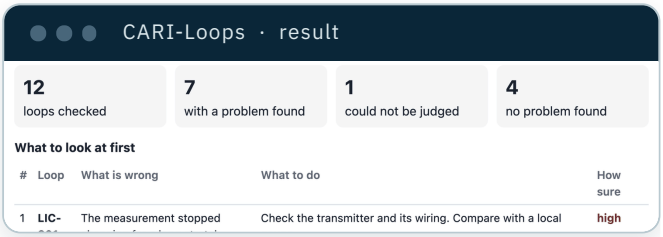

→

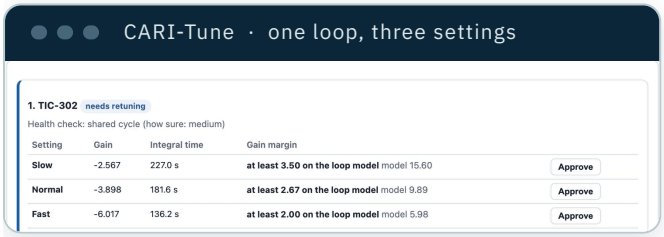

YOU READ

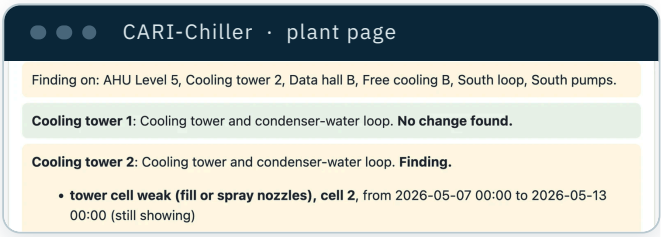

Named findings, or new settings, in plain words.

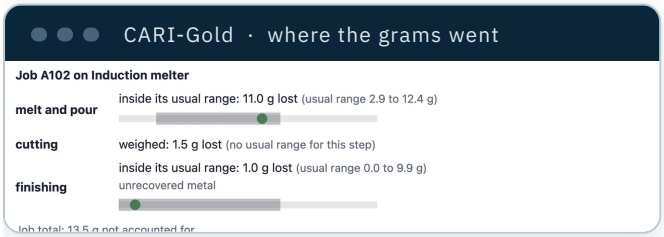

ON SCREEN, EDITION BY EDITION

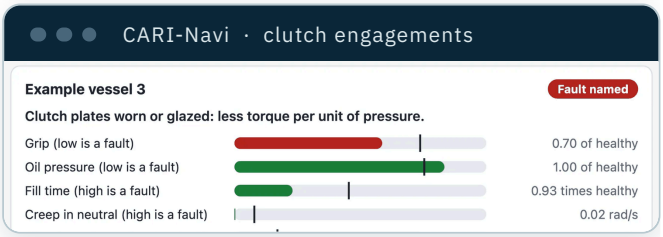

WHAT WE NEED FROM YOU

A routine export
From your control system, BMS, historian or log sheets.

Your names and units
Your engineer confirms them on screen.

A first plant or unit
One is enough to start.

→

WHAT YOU GET

Named findings or settings
In plain words, on your own PC.

What needs attention first
A ranked list, an urgency grade or named faults first.

Pages to print
And the files your edition gives: alerts, work orders, settings sheets or accounts files.

START WITH ONE PLANT

Email contact@carimo.tech for a walkthrough on your own PC. We set CAPMAC up with your team and read the first findings together.
